

Brand & UI System V1

CUSTOMER APPROVAL DRAFT

A proposed brand and digital experience standard for Cookies & Chips. Items marked PROPOSED reflect our best interpretation of the existing logo, website mockup and business direction and are intended for approval or

BUSINESS

Cookies and Chips LLC - Arizona LLC
Public brand: Cookies & Chips

What Cookies & Chips should feel like

The product is the hero. The brand makes it warmer, more personal and more memorable.

WARM

Inviting, human, cream-toned.

PREMIUM

Editorial and composed, never generic.

HANDMADE

Texture, craft and small-batch imperfection.

PLAYFUL

Joy, mascot personality and selective whimsy.

PERSONAL

Heather and the story matter.

CHEEKY

Confident lines like 'Eat the damn cookie.'

Core principle

Make people hungry first. Make buying easy second. Decorative brand elements support those jobs; they never compete with them.

Primary mark + proposed supporting marks

The supplied circular logo is the current primary logo. Supporting derivatives are proposed, not yet final assets.

PRIMARY LOGO

Use the supplied circular mark intact. Preserve proportions, colors and artwork. The exterior of the circle should remain transparent in web assets.

PROPOSED

Supporting assets to create

- Horizontal/header lockup
- Simplified cookie mark
- Favicon/app icon
- Social avatar
- Single-color fallback

USAGE RULES

Clear space: minimum 12% of logo diameter.
Minimum digital size: 72px for full circular mark.
Do not stretch, rotate, recolor, add shadows or place on busy imagery without sufficient separation.

Warm bakery neutrals + restrained accents

PROPOSED values extracted/inferred from the existing brand assets and mockup. Every token is visible and implementation-ready.

Chocolate / Primary

Botanical support

Ink

#2A201B RGB 42,32,27

Primary text

Semantic use and states

Colors have jobs. Admin theme controls may adjust approved semantic tokens, not arbitrary CSS.

ROLE	DEFAULT	HOVER/PRESSED	FOCUS	DISABLED
Primary action	Chocolate	Cocoa/darker	Chocolate + visible focus	Warm neutral
Accent action	Coral	Slightly deeper coral	Coral + visible focus	Warm neutral
Success	Leaf / success green	-	-	-
Warning	Warm amber	-	-	-
Error	Muted brick red	-	-	-

PROPOSED

Admin theme configuration: allow controlled changes to Primary, Accent, Background and Text using validated theme values/presets. The design system must automatically preserve readable contrast and component states.

Proposed production font system

Actual font families are proposed for customer approval; functional UI stays highly readable.

PROPOSED

Cookies make life better.

DISPLAY / HEADINGS: DM Serif Display - 400. Editorial, warm and distinctive.

CHOCOLATE CHIP - 1 DOZEN

BODY / UI: Inter - 400 / 500 / 600 / 700. Navigation, pricing, forms and functional text.

baked with love

ACCENT SCRIPT: proposed handwritten web font (e.g. Allura) used sparingly for emotional phrases only. Never for pricing, navigation, forms or essential instructions.

TYPE SCALE

STYLE	DESKTOP	MOBILE
Hero	48/52 px	40/44 px
H1	38/44 px	32/38 px
H2	30/36 px	26/32 px
H3	22/28 px	20/26 px
Body L	18/28 px	17/26 px
Body	16/24 px	16/24 px
Small	14/20 px	14/20 px
Meta	12/16 px	12/16 px
Button	14/16 px	14/16 px

Warm, human, confident and occasionally cheeky

The copy should sound like a person who loves baking, not a corporate ecommerce platform.

SOUNDS LIKE US

Cookies make life better.

Your cookies are officially happening.

Life's short. Eat the damn cookie.

Freshly baked. Small batch. Made with love.

DOESN'T SOUND LIKE US

Your transaction has been successfully processed.

Premium confectionery solutions.

Excessive baby-talk or forced cuteness.

Jokes that obscure price, allergens or checkout instructions.

Make the cookie the damn hero

Close, warm, tactile, real. Product imagery should create appetite before the interface asks for a click.

Hero	16:9-ish / wide crop	High resolution; melted chocolate, texture, dramatic but natural warmth.
Product card	4:5 or 1:1 consistent	Cookie fills frame; clean but warm environment.
Product detail	4:5 primary + detail gallery	Show crumb, thickness, chips/fillings, packaging where useful.
Founder/story	4:5 / environmental	Real baking environment, warm light, candid craft.
Pet treats	4:5 / 1:1	Clearly distinct from human cookies; product-first, clean context.
Social	1:1 / 4:5	Lifestyle and process can be looser while staying on brand.

Avoid: sterile catalog imagery as the dominant look, cool/blue color casts, obvious AI artifacts, plastic-looking food, inconsistent crops, aggressive filters, or decorative UI covering the product.

Handmade personality, functional clarity

Decorative artwork can be whimsical; functional controls must remain immediately understandable.

FUNCTIONAL ICONS

Simple, lightweight line icons with consistent stroke. Cart, account, arrows, menu, close, social.

BRAND MOTIFS

Hearts, hand-drawn arrows, cookie crumbs and botanical sprigs may echo the logo/mockup.

MASCOT / COOKIE ART

Use intentionally in brand moments, packaging/social and selected empty states - not everywhere.

RULE

A decorative icon must never replace a clear label when the action could be ambiguous.

Editorial breathing room + consistent commerce rhythm

Use spacing and hierarchy before shadows and decoration.

4px Micro	8px Tight	12px Compact	16px Base	24px Component	32px Small section	48px Section	64px Large section	96px Hero
---------------------	---------------------	------------------------	---------------------	--------------------------	------------------------------	------------------------	------------------------------	---------------------

GRID Desktop max content width: approximately 1200-1280px. 12-column grid where useful; not every editorial section must visibly behave like a grid.

RADII Cards 8-12px. Buttons/inputs 5-8px. Pill badges may use full rounding.

BORDERS Warm low-contrast neutral. Use 1px by default.

SHADOWS Minimal and soft. Prefer background shifts and spacing before elevation.

Simple storefront navigation

The header should disappear into the shopping experience, not dominate it.

Desktop: logo left, concise nav, account/cart right. Active state should be understated. Header may become sticky only if it remains visually light.

One obvious primary action at a time

Buttons are confident, compact and warm - not giant SaaS pills.

PRIMARY	 A dark brown button with rounded corners and the text "SHOP COOKIES" in white, uppercase letters.	Main conversion action.
SECONDARY	 A white button with rounded corners, a thin black border, and the text "LEARN MORE" in black, uppercase letters.	Lower-priority alternative.
ACCENT	 A salmon-colored button with rounded corners and the text "GET THIS MONTH'S COOKIE" in white, uppercase letters.	Special merchandising emphasis.
TERTIARY	 A thin, dark brown horizontal line with the text "READ MY STORY ->" in dark brown, uppercase letters.	Editorial/text navigation.

STATES

Default -> hover -> pressed -> focus -> loading -> disabled. No state may shift layout. Focus must remain clearly visible. Loading keeps the action context. Disabled controls remain readable but unmistakably inactive.

Friendly, quiet, obvious

Checkout forms should feel shorter than they are.

EMAIL

you@example.com

ZIP CODE

85000

FULFILLMENT

Local Pickup v

VALIDATION

Errors appear next to the field in plain language. Never rely on color alone. Preserve user-entered values.

CHOICE CONTROLS

Checkbox/radio/select targets must be large enough for touch. Labels remain clickable and explicit.

Dozen-first merchandising

The sellable unit is a dozen. The interface must never imply individual-cookie quantities.

Chocolate Chip

1 DOZEN (12 COOKIES)

\$XX.XX

ADD TO CART

QUANTITY

- 1 DOZEN +

Quantity 2 = 2 dozen = 24 cookies.

Cookie of the Month

Prominent merchandising card with product image, name, short emotional copy, dozen price and dedicated CTA.

CATALOG STRUCTURE

Shop -> dynamic Category -> optional Subcategory -> Product. Collections are separate merchandising constructs: Best Sellers, Featured, Cookie of the Month, Seasonal and future owner-created collections.

Guest and logged-in checkout, one commerce pipeline

Authentication reduces friction; it does not create a second checkout system.

SHIPPING

Admin ON/OFF. When OFF, shipping is not shown. When ON, the actual selected destination/ZIP determines the shipping rate before payment.

ACCOUNT

Guest checkout is fully supported. Logged-in customers may use saved details/addresses and see order history/reorder.

Quiet confidence

System feedback should reassure the customer without hijacking the shopping experience.

SUCCESS

Added to your cart.

INFO

Shipping calculated at checkout.

WARNING

Only a few dozen available.

ERROR

Please check your ZIP code.

Also define: empty cart, no orders yet, sold out, loading/skeleton, payment failure, shipping unavailable and offline/retry states. Use plain language and preserve the customer's work.

Mobile is a first-class storefront

The production mockup is desktop-led; these rules govern how the experience adapts.

Hero	Stack/reframe image and copy; keep Shop CTA above the fold where practical.
Best Sellers	2-column grid or horizontal product rail depending content density.
Cookie of Month	Dedicated full-width card after/beside best sellers.
Story	Image then concise copy; preserve personal tone.
Reviews	Single-card carousel/stack with obvious controls.
Social gallery	Horizontal scroll/compact grid.
Product page	Image-first, then title/price/dozen quantity/add-to-cart.
Cart/Checkout	Single column; summary remains easy to review.
Header/Footer	Collapsed mobile nav; simplified footer hierarchy.

Alive, not distracting

Motion is subtle; accessibility is part of the design system, not a later patch.

MOTION

Product hover: subtle scale/contrast only.
Buttons: quick hover/press feedback.
Cart: brief confirmation.
Drawers/carousels: smooth, short transitions.
Respect reduced-motion preferences.
No decorative animation that blocks shopping.

ACCESSIBILITY

WCAG-minded contrast.
Visible keyboard focus.
44px-ish touch targets where practical.
Semantic headings/forms.
Alt text for meaningful images.
Errors use text + state, not color alone.
Script font never carries essential information.

Does this feel like Cookies & Chips?

Use this page as an acceptance test for humans, designers and AI agents.

YES

- + Warm
- + Food-first
- + Handmade
- + Personal
- + Editorial
- + Playful
- + A little imperfect
- + Premium without pretension
- + Occasionally cheeky
- + The cookie is the hero

NO

- Corporate
- Generic Shopify
- SaaS-looking
- Sterile
- Over-designed
- Childish/cartoon-heavy
- Luxury-fashion pretentious
- Too much animation
- Too many colors
- Generic AI food imagery

Flexible inside guardrails

The owner can manage meaningful brand/theme settings without editing raw CSS or breaking the visual system.

1. BRAND SYSTEM

Stable, customer-approved identity.

Logo system, approved palette, typography family, voice, photography direction.

2. THEME CONFIGURATION

Controlled presentation choices.

Logo/favicon, approved semantic colors, font presets, button radius preset.

3. CONTENT & MERCHANDISING

What the site says/sells today.

Hero, Cookie of Month, best sellers, story, reviews, social, announcements.

Proposed owner-configurable settings

Semantic configuration only - no arbitrary CSS editor.

BRAND / THEME

- Primary logo
- Simplified mark
- Favicon
- Primary color
- Accent color
- Background color
- Text color
- Heading preset
- Body preset
- Accent preset
- Button radius preset

HOMEPAGE

- Hero image/copy/CTA
- Cookie of the Month
- Best Sellers
- Featured collection
- Story image/preview
- Selected reviews
- Social content
- Final banner
- Section visibility

STORE / SITE

- Shipping ON/OFF
- Pickup ON/OFF
- Announcement bar
- Announcement text
- Sold-out visibility
- Social links
- Contact info

Website Mockup - visual direction and design intent

This is not a pixel-perfect representation of the final production website.

WHAT THIS MOCKUP DOES

It establishes visual direction: warmth, hierarchy, product photography, editorial typography, merchandising emphasis, founder presence and restrained ecommerce chrome.

WHAT IT DOES NOT DO

It does not dictate every production pixel, mobile layout, final copy, final product photography or every component state. The approved Website Specification + Brand & UI System govern implementation.

Customer approval summary

Principal proposed decisions to approve or change before this guide becomes final canon.

Brand personality	Warm, premium, handmade, playful, personal, slightly cheeky.
Primary logo	Supplied circular logo; create horizontal, simplified and favicon assets.
Colors	Chocolate #4A2A1D; Paper #FFF9F0; Cream #F7E8CF; Coral #E87863 + support palette.
Typography	DM Serif Display + Inter + restrained script accent (proposed Allura or equivalent).
Photography	Warm, close, tactile, natural-looking and food-first.
UI	Editorial, restrained, warm surfaces, minimal shadows, clear chocolate CTAs.
Commerce	Cookies sold only by the dozen; quantity counts dozens.
Checkout	Guest + authenticated checkout using one shared commerce pipeline.
Shipping	Admin ON/OFF; destination/ZIP-based rate when enabled.
Admin theme	Controlled semantic theme + merchandising configuration; no raw CSS.
